

COREY ITALIANO

Boise, Idaho | 208-760-9280 | paisanitaliano@gmail.com | www.corey-italiano.com | github.com/imaginariumitaliano

SUMMARY

Technical professional who builds and deploys AI systems rather than only using them. Deployed a locally hosted LLM controlling smart home automation and serving as a writing assistant. Shipped a production website and a companion mobile application published on both iOS and Android, built through GitHub and agentic coding workflows. Developed a documented prompt specification system producing reproducible output across hundreds of generations. Backed by over ten years as a smart home and low-voltage systems technician across 7,000+ installations and service calls, plus a complete content production pipeline spanning writing, audio engineering, video, and graphic design. Seeking a remote AI enablement, AI training, or AI workflow role.

CORE SKILLS

AI Systems & Workflows: Local and offline LLM deployment · Agentic coding workflows (Claude Code) · Prompt engineering and specification design · Reproducible prompt systems · AI-assisted content production pipelines · AI workflow documentation and standardization · Model output evaluation · Git and GitHub version control

Domain Expertise for AI Evaluation: Residential security and home automation systems · Low-voltage installation and field service operations · Network and wireless mesh troubleshooting · Long-form fiction writing and narrative craft

Content & Media Production: Adobe Photoshop · Audacity (audio restoration and mastering) · Filmora (video production) · Technical documentation · Procedural writing · Long-form authorship

Technical: Smart home and IoT systems · HTML/CSS · macOS and Linux environments · Hardware integration and commissioning

AI PROJECTS

Locally Hosted LLM — Smart Home Control and Writing Assistant

Deployed a self-hosted language model running entirely on local hardware, with no cloud dependency, serving two functions: natural-language control of home security and automation systems, and an always-available writing assistant. Designed the architecture including the boundary between the model layer and the device control layer.

corey-italiano.com and The Dova Sku Series Companion — Agentic Development Workflow

Built and shipped a production author website and a companion mobile application, The Dova Sku Series Companion (TypeScript), published and live on both the iOS App Store and Google Play. Developed through GitHub and Claude Code, directing the work via agentic development rather than writing the codebase by hand: scoping tasks, reviewing output, iterating on failures, and managing version control and releases throughout. Carried both products through store review and multiple release cycles, resolving structural, accessibility, and cross-browser defects along the way. Source repositories are public at github.com/imaginariumitaliano.

Prompt Specification System — Reproducible Visual Output

Developed a documented, structured prompt template that enforces consistent style across hundreds of image and video generations. Formalized a fixed field order covering shot type, composition, subject, environment, lighting, camera, and style, with modular extensions by scene type. The system exists specifically to make output reproducible rather than ad hoc, and has governed all published visual content for two book series.

AI-Assisted Writing Pipeline

Integrated AI tooling into a long-form fiction workflow across four books, including drafting support, continuity checking against an established canon, and marketing content generation. Maintained a written canon reference that constrains model output to series-consistent terminology and description.

PROFESSIONAL EXPERIENCE

Author, AI Systems Builder & Content Producer — Independent

Corey Italiano (pen name) | January 2023 – Present

- Built the four AI systems described above, from local model deployment through agentic application development and prompt system design.
- Wrote and published two science fiction novels, with a third nearing publication and a fourth in draft.

- Engineered 24.5 hours of finished audiobook audio, performing noise reduction, artifact removal, level correction, and final mastering in Audacity.
- Produced and scripted multi-platform video content for TikTok, Instagram Reels, and Facebook, running an AI-assisted production pipeline end to end from script through published asset.

Smart Home Installation Technician

Vivint Inc. — Boise, Idaho | August 2020 – Present

- Averaged 12 installations and 15 service and upgrade tickets per week — 27 completed jobs weekly — totaling 7,000+ completed installations and service calls.
- Diagnosed and resolved complex system faults spanning security panels, cameras, sensors, thermostats, smart locks, network connectivity, and wireless mesh performance.
- Translated technical system behavior into plain-language explanations for homeowners with no technical background on every installation.
- Trained and onboarded new field technicians on installation procedure, product configuration, and troubleshooting methodology.
- Contributed to establishing a new full-time Boise office, helping build out field operations in a market with no existing local team.

Installation Technician → Sales Representative

Shadeworks | May 2018 – August 2020

- Installed patio cover and pergola systems from site assessment through completed build.
- Promoted into a sales role advising homeowners on product specifications and pricing.

Transaction Coordinator, Property Manager & Marketing Lead

Full Sail Real Estate | September 2016 – May 2018

- Coordinated real estate transactions end to end, managing documentation, compliance deadlines, and multi-party communication.
- Ran property management operations for a rental portfolio.
- Directed social media marketing and produced listing photography and video content.

Transaction Coordinator & Drone Photographer

Dave Kallas & Associates | March 2014 – September 2016

- Managed transaction documentation, filing deadlines, and multi-party coordination.
- Produced aerial photography and video for property marketing.

Title Runner & Plat Mapping Specialist

TitleOne | September 2011 – February 2014

- Drafted and created plat maps from recorded legal descriptions, converting written specification into accurate technical output.
- Researched, posted, and filed title information with county courts.

Smart Home Installation Technician

Vivint Inc. | March 2007 – September 2011

- Installed and serviced residential security and home automation systems during the company's early growth period.

LICENSES & CERTIFICATIONS

- **Low Voltage License** — State of Idaho
- **Vivint Technical Continuing Education** — quarterly and annual certification programs, 2020–Present
- **FAA Part 107 Remote Pilot Certificate** — issued 2017, no longer held
- **Idaho Real Estate License** — formerly held
